

HARD RESET

TECHNICAL & AV RIDER

RESIDENT AV SHOWCASE

PRIMARY CONTACT

Michael Good
Down Special Labs

AUDIO INFRASTRUCTURE

■ SUPPLIED BY ARTIST

- 1x Pioneer DDJ-GRV6 DJ Controller
- 1x Apple MacBook Pro (running Rekordbox / Serato)

NOTE TO FOH

Artist provides a fully self-contained stereo mix. No outboard vocal processing or analog preamps will be patched into the house system.

■ SUPPLIED BY VENUE

- 2x XLR inputs (Left/Right) at the DJ booth to patch directly from the DDJ-GRV6 Master Out into the house mixer (e.g., Pioneer DJM-A9 or V10) or FOH snake.
- 2x High-output DJ booth monitors with independent volume control.

VISUAL INFRASTRUCTURE

▪ SUPPLIED BY ARTIST

- **1x** Apple MacBook Pro (Dedicated visual server running Resolume Arena)
- Custom animated assets and live generative compositions synchronized to the audio set.

▪ SUPPLIED BY VENUE

- **1x** HDMI or SDI drop directly at the DJ booth to connect the visual server to the house LED wall or projector system.

NOTE TO VJ / LD

Artist will provide a continuous 16:9 1080p/4K visual feed. Venue retains control of house lighting, strobes, and lasers.

POWER & STAGING

▪ SUPPLIED BY VENUE

- **Minimum 1x** 6-foot sturdy table or standard club DJ booth.
- **Minimum 3x** standard 120V power outlets dedicated to the artist's equipment (Controller, Audio Laptop, Visual Laptop).

This document outlines the minimum technical requirements for the Hard Reset performance.
For any technical questions or deviations, please contact Michael Good prior to the day of show.
